BULK HANDLING SOLUTIONS

DESIGN

All our Telescopic Conveyors and Bulk Reception Feeders are engineered to the highest standards, fully built and tested at the factory before delivery. Designed to be broken down and economically shipped worldwide by standard shipping container, this allows for safe and efficient assembly at the customers site and any future relocation.

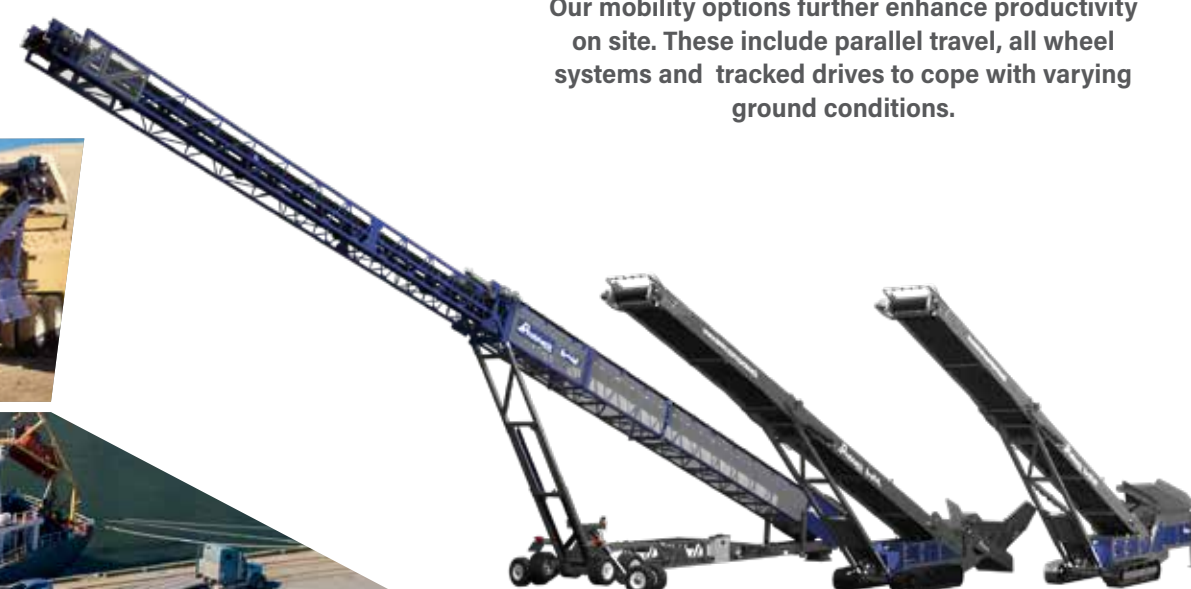

FLEXIBILITY

We supply flexible solutions to meet the specific needs of your application with a multitude of tried and tested options available, ensuring our equipment meets your demands and maximises the efficiency and profitability of your operation.

MOBILITY

Our equipment provides continuous efficient loading, stockpiling and transfer of bulk materials and minimises down time through costly repositioning of equipment.

Our mobility options further enhance productivity on site. These include parallel travel, all wheel systems and tracked drives to cope with varying ground conditions.

Telescopic Conveyors

Tracked & Bulk Reception Feeders

DUST CONTAINMENT AND SUPPRESSION OPTIONS TO HANDLE ALL BULK PRODUCTS AND ENVIRONMENTS.
