Features

Stinger Drive

Patented design provides constant, positive traction and smoother operation of stinger

No cable maintenance issues associated with winch systems

Eliminates danger of cable breakage and uncontrolled roll back

Swing Axle Undercarriage

The Swing Axle system provides the widest and most stable radial footprint in the industry.

A Variable Speed Wheel Drive allows for even distribution of material for fully desegregated stockpiles.

An optional 4-wheel Drive System ensures positive traction in the field.

Folding Axle (FA)

Drop down Folding Axle allows for transition between operational and travel positions in just minutes.

Both axles can be hydraulically raised or lowered independently or at the same time simplifying the leveling process.

FA Axles are available in both 2 and 4-wheel drive models

Hydraulic Wheel Drives

The innovative wheel drive simplifies the set up process and reduces maintenance time by removing the chain.

Allows the operator to engage and disengage the drive by simply flipping a lever on the hub

Deployment Engine

- 13 hp Gas Powered Unit to ease operational setup
- Removes need for electric power during setup
- Allows user to operate axle jacks for radial deployment
- Retract and Extend stinger conveyor away from pile

On board Electric Hydraulic powerpack

- On board Auxiliary Hydraulic pump
- Proportional Valve system ensures smooth start stop machine articulation
- Large capacity hydraulic tank and integrated Oil Cooler.
- Easy access for maintenance and service
- Covered canopy to ensure cleanliness.

PLC controller

- Most user friendly PLC on the market
- Large, color touch screen for easy interaction and high visibility
- PLC in conjunction with variable speed wheel drives create the highest quality desegregated piles
- Encoders work the PLC to accurately locate X, Y, and Z locations of head pulley
- Customizable programs enable users to choose their stockpiling preference
- All NEMA class components ensuring reliability in the field - no IEC spec electrical components

Specifications

Telson™ 4-42

Operational Dimensions

Operational Dimensions	Imperial	Metric
Belt width	36"	900 mm
Extended discharge height Max	47'-9"	14,550 mm
Extended discharge height Min	18'	5,700 mm
Retracted discharge height Max	31' 0"	9,455 mm
Retracted discharge height Min	13' 7"	4,150 mm
Feed Height	9' 3"	2,850 mm
Working Angle Min	6°	
Working Angle Max	18°	

Transport Dimensions

Transport Dimensions	Imperial	Metric
Length	89'-11"	27,400 mm
Height	13'-6"	4,100 mm
Width	11'-4"	3,450 mm
Total Weight	61,680 lbs	28,000 kg

ProStack[™]
A TEREX BRAND

WHAT WE OFFER?

- **Multitude of tried and tested options are available to ensure our equipment meets your demands**
- **We provide the solutions to meet the specific needs of your operation to provide extended flexibility of our products to improve the efficiency and profitability for your operation.**
- **Mobility options to enhance productivity on site, including parallel travel , wheel and tracked drives to cope with varying ground conditions**
- **Dust Containment and Suppression options to handle all bulk products and environments.**
- **Conveyor Belt specification options**
- **Roller and Pulley Lagging options**
- **Bin Liner and impact bed options at transfer points**
- **Radio remote control options**
- **Operation and maintenance platform and walkway options**
- **Finishing options. All conveyors are painted to the highest Marine specifications**
- **Galvanised finish and customised colour options available.**
